Hydropower in the Mekong River Basin - Wikipedia

The Mekong Basin is home to some 70 million people, for whom this great river is a source of livelihoods, the basis for their ecosystems and a foundation of their economies. But the Mekong is also currently undergoing enormous social, economic, and ecological change of which hydropower development is a significant driver.

Hydropower Development in the Mekong Region: Political ...

Hydropower development in the LMB brings both positive and negative consequences. According to the MRC Council Study on the Sustainable Management and Development of the Mekong River Basin including Impacts of Mainstream Hydropower Projects, the LMB could see economic gains from full hydropower development of more than \$160 billion by 2040. Development of hydropower brings synergies with other water related sectors as well, including expanding irrigation that is key to food security ...

Hydropower - Mekong River Commission

The model of hydropower development being pursued in the Mekong is cascades of dams, where each dam spills directly into the next downstream pondage. This model, widely applied in China, maximizes the potential electricity yield, but it also maximizes the negative environmental and social impact of dams.

Frontiers | Hydropower Development and the Loss of ...

Energy hungry. An increase in power demand along with inflated forecasts of future demand, volatile prices in international energy markets, and concerns over carbon emissions have intensified interest in hydropower development – one of the Greater Mekong’s major renewable energy sources.

Hydropower development in the Greater Mekong | WWF

The statement added that over the last decade, intensive hydropower development has brought substantial economic benefits to the Mekong countries. That being said, the gains have resulted in...

MRC releases new guidelines for Mekong hydropower development

PDF. The Mekong River is one of the world's last large rivers remaining mostly undammed. But China is constructing a series of eight hydropower projects on the upper Mekong. Although there are...
