Urbanization & Other Effects of the Industrial Revolution ...

The industrial revolution has tended to produce everywhere great urban masses that seem to be increasingly careless of ethical standards. – Irving Babbitt The period between the second half of the 18th century and first half of the 19th century was the time when the entire world witnessed a great transition from muscle power to machine power.

The Effects of Urbanization During the Industrial Revolution

Immigrants in the 1800's had a tough time a lot of them had a language barrier. The industrial revolution started before the civil war and immigration to the USA is not new. There was new generation of immigration called the 'new immigration'. It was named to distinguish who came in European Jews, Italians and others.

Industrial Revolution and New Immigration

In-migration from Britain's rural areas and foreign countries contributed to a steady rise in population as the Industrial Revolution was underway. This growth provided cities with workforces they desperately needed to keep up with new developments and allowed the revolution to continue for several decades.

Population Growth and Movement in the Industrial Revolution

As the industrial revolution started, many people lived in cities and most of their needs were produced by complicated machines. The Industrial Revolution began in Great Britain and spread to Belgium, France, Germany, the United States and Japan.
