Limited funding and time force abandoned mine land (AML) reclamation programs to prioritize closures. By entering abandoned underground workings, the true hazard level can be evaluated to determine which sites should be prioritized for closure. It is also often necessary to enter an abandoned mine in order to design and implement a suitable closure.

Because all land -- including inactive or abandoned mine land -- has an owner, it is not clear whether this language limits the universe of LAMs that will be subject to the permit requirements. Another question arises regarding whether an "owner/operator" is "identifiable." Ownership of mineral interests is often highly fragmented -- e.g. ...

Michael N. Greeley, USDA -  
Forest Service, Washington,  
D.C. . Presentation to SME,  
March 1999 ABSTRACT. The  
movement to reclaim  
abandoned mine sites has  
gained momentum as federal,  
state, and private  
organizations have increased  
their commitment and  
resources to tackle mutual,  
and often controversial,  
problems of health and  
safety.
