Unfortunately, I think they are missing some important facts. Most index funds and exchange-traded funds (ETFs) are below-average investments. Here's why. Fidelity's study compares strategies.

## ~~Why Most Index Funds And ETFs Are Not Good Investments~~

ETF is a fund that will track a stock market index and trade like regular stocks on the exchange, whereas index funds will track the performance of a benchmark index of the market. The pricing for ETF takes place throughout the trading day, but index funds get priced at the closing of the trading day.

## ~~ETF vs Index Funds | Top 8 Differences You Must Know!~~

Both index funds and ETFs fall under the heading of "indexing." Both involve investing in an underlying benchmark index. The primary reason for indexing is that index funds and ETFs can often beat actively managed funds in the long run.

## ~~The Pros and Cons of Index Funds and ETFs~~

An index fund is a fund that tracks the performance of an index and tries to mirror the performance of said index as

effectively in entire markets with one security.

~~Exchange-traded funds: What is an ETF? | justETF Academy~~

It is often advisable to have a combination of ETFs and index funds in one's portfolio. One of the criteria for deciding between index funds and ETFs is tradability. If intraday tradability is a crucial requirement, then only ETFs are worth considering. Since ETFs are listed on securities exchanges, market makers guarantee trading liquidity.
