~~Industrial Ventilation...~~

Industrial ventilation generally involves the use of supply and exhaust ventilation to control emissions,

# Where To Download

exposures, and chemical hazards in the workplace.

Traditionally, nonindustrial ventilation systems commonly known as heating, ventilating, and air-conditioning (HVAC) systems were built to control temperature, humidity, and odors.

# Where To Download

There are two types of mechanical ventilation systems used in industrial settings:

Dilution (or general) ventilation reduces the concentration of the contaminant by mixing the contaminated air with clean, uncontaminated air.

Local exhaust ventilation captures contaminants at or very

# Where To Download

near the source and  
exhausts them outside.
