## **Integumentary System Study Guide Flashcards | Quizlet**

Skin, or the integumentary system, is a great place to begin a tour through the human body systems. There are a lot of connections that can be made between this unit and the histology and cells units. The vocabulary and number of structures in this unit is not as overwhelming as some of the later body systems.

Functions of the Integumentary system 1.  
protection a) chemical factors in the skin:  
Sebum (or oil) from the sebaceous glands is  
slightly acidic, retarding bacterial  
colonization on the skin surface. Sweat from  
the sudoriferous glands is slightly  
hypertonic and can flush off most bacteria on  
the skin surface.
