International Journal Of Malaria Research

Malaria Journal is aimed at the scientific community interested in malaria in its broadest sense. It is the only journal that publishes exclusively articles on malaria and, as such, it aims to bring together knowledge from the different specialties involved in this very broad discipline, from the bench to the bedside and to the field.

Abstract. Background: Malaria is one of the infectious diseases of greatest interest to the scientific community and of greatest concern to international health authorities. Traditionally, the focus has been on Plasmodium falciparum, the parasite that causes the most severe form of the disease in Africa. However, in the last twenty years, the Plasmodium vivax parasite, responsible for a large number of cases in Latin America, the Middle East, South and Southeast Asia, the Horn of Africa, and ...

Analysis of Global Research on Malaria and Plasmodium vivax

The International Journal for Parasitology publishes the results of original research in all aspects of basic and applied parasitology, including all the fields covered by its Specialist Editors, and ranging from parasites and host-parasite relationships of intrinsic biological interest to those of social and economic importance in human and veterinary medicine and agriculture. Original research includes the development of novel and innovative concepts and ideas, as well as experimental and ...

Malaria, Plasmodium vivax, Plasmodium falciparum, Malaria microscopy, Rapid test INTRODUCTION: Malaria is still a major international health problem, responsible for 214 million infections worldwide and 438,000 deaths in 2015. It is one of the big – three infectious cause of death around the world, the two other being tuberculosis and HIV/AIDS.

A RETROSPECTIVE STUDY OF MALARIA FROM WESTERN PART OF ...

Interests: My research activities focus on biostatistics and biomathematics methods applied to the geo-epidemiology of communicable disease and their control in developing countries, mainly on malaria transmission, based on spatiotemporal assessment of transmission dynamics. My interests include the development of surveillance information system, spatial and temporal modeling of outbreak risks, taking into account environmental determinants and control strategies.

IJERPH | Special Issue : Geo-Epidemiology of Malaria

Background Malaria, remains one of the leading causes of high morbidity and mortality in Nigeria despite implementation of several public health interventions for its control. Operational limitations and methodological gaps have been associated with malaria control interventions and research, and these have necessitated the need for a well-tailored Malaria Operational Research (MOR) agenda.

A qualitative exploration of malaria operational research ...
