The Beginner's Guide to your Internet Speed | by The Guide

...

Internet speed is the measure of how fast information is transferred, while bandwidth refers to the capacity of an individual internet connection. So if your internet connection has a bandwidth of 5 Mbps, your speed would only be that fast if it's operating at full capacity.

The actual speeds you'll see in your home depend on a variety of factors: your ISP connection, your modem, the layout and construction of your home, and much more. To choose a speed, consider your internet activity: for the average internet user, AC1200 routers are usually sufficient.

5) Security: WEP, WPA, and WPA2, oh my!

---

5 important router specs, explained – The Download

To determine the speed required to run an application, read the technical specifications or search a website. For example, streaming service Netflix recommends speeds from 1.5 Mbps to 12 Mbps, depending on whether you want standard quality, DVD, HD, or super HD quality. With this information, look for a broadband provider that delivers this speed.
