Welcome to my page of solutions to "Introduction to Algorithms" by Cormen, Leiserson, Rivest, and Stein. It was typeset using the LaTeX language, with most diagrams done using Tikz. It is nearly complete (and over 500 pages total!!), there were a few problems that proved some combination of more difficult and less interesting on the initial

Selecting  $c_2 = 1$  clearly shows the third inequality since the maximum must be smaller than the sum.  $c_1$  should be selected as  $1/2$  since the maximum is always greater than the weighted average of  $f(n)$  and  $g(n)$ . Note the significance of the asymptotically nonnegative assumption. The first inequality could not be satisfied otherwise. 3:1-4
