Planning Your Lawn Irrigation System.
By Lance Walheim, The National
Gardening Association. Even if you
can't draw a straight line, you have to
make a map of your property to plan
your irrigation system. Draw your map
to scale (such as 1 inch equals 10
feet) on graph paper as accurately as
possible (most irrigation system
instructions include graph paper for a
map).

Where To Download Irrigation Systems Design For Windows And Construction

Drip irrigation systems take some planning to install, but conserve water by putting it only where it needs to be and applying it at a rate slow enough that none is lost to runoff or evaporation. In areas where water is scarce or use is restricted, drip systems can make the best use of a garden's water allowance.
