ISO Guide 33:2015 describes good practice in using reference materials (RMs), and certified reference materials (CRMs) in particular, in measurement processes. These uses include the assessment of precision and trueness of measurement methods, quality control, assigning values to materials, calibration, and the establishment of conventional scales.

ISO/REMCO, the Committee on Reference Materials of the International Organisation for Standardisation, has revised ISO Guide 33. In doing so, the document now provides a more comprehensive coverage of the mainstream applications of reference materials (RMs) and certified reference materials (CRMs).
