The best thing to do is to get the van to some one who can read the faults, most garages these days will have a hand held tool that will show what fault has caused the light to come on, it will give a "P-Code" e.g. P1212, These codes will pinpoint the exact cause of the problem, and with so many possibilities and the cost of parts its simply not worth guessing.

2004 Iveco tector edc code
shown = low fuel pressure?
Hi , 2004 Iveco tector 7.5 t
70000 miles .It has a fault
code on the edc which the
garage told me relates to
low fuel pressure ,the the
engine runs smoothly but
wont rev over 2700 rpm also
it is completeley down on
power. It will get to 56 mph
on the flat but even the
slightest of hills it slow
down to very low speeds
please tell what needs
