Let's say we wanted to make a call to a

Acces PDF Java Methods

Chapter 8 Solutions

method that returned a two-dimensional array of type `Rectangle` and we wanted to assign that to this variable `grid`. Before Java 10, we'd need to type out this data type, which is a bit annoying and cumbersome. Now, with Java version 10 and later, we can simply use the reserved word `var` as the data type.
