I have a John Deere lx188 lawn tractor that is giving me fits lately. It started surging at idle and even during mowing when the PTO is engaged. I did some research on this problem and seems common. So I cleaned all the fuel lines and blew compressed air through them. Replaced the fuel filter. Removed the tank, emptied gas and cleaned it out.

Ok, I have a John Deere LA115 Mower. It has about 125 hours on it and I have maintained it well until last year when it sat outside for the entire year. I moved and just had no place to put it. Now, it starts ok but the engine revs and slows at idle or under no load. When I engage the mower, the engine calms down and maintains a steady rpm.
