In graph theory, the Katz centrality of a node is a measure of centrality in a network. It was introduced by Leo Katz in 1953 and is used to measure the relative

Download Free Katz The Foundations Of

degree of influence of an actor within a social network. Unlike typical centrality measures which consider only the shortest path between a pair of actors, Katz centrality measures influence by taking

Download Free Katz The Foundations Of

into account the total number of walks between a pair of actors. It is similar to Google's PageRank and to the eigenvector centrality.
