As we shall see throughout this chapter, braids are closely related to knots and we need to look at knots to appreciate braids fully. Knot theory was started in the 1860's by Peter Guthrie Tait, a Scot-tish mathematician, who endeavored to make a list of topologically distinct knots in response to a request by William Thompson (later Lord Kelvin)

without much fuss. However, knotless braids present a challenge that can happen with traditional box braids (but could be a little more difficult to hide since the hair at the scalp isn't intertwined with kanekalon hair): Frizz. We know.

The Complete Guide to Knotless Braids

The Berkley Braid Knot . Fold over the end of the line so you have 5-6 inches of doubled line, making a loop. Thread the end of the doubled line loop through the eye. Squeeze the end of the loop to form a point, this'll make this step much easier; Wrap the loop around the tag-end and the mainline 8 times. Start from the top and wrap towards the eye.

Knotless braids have been around since the early 2000's but after years of being on the fringe of hair braiding they've taken over. The term knotless references the knot used to start traditional box braids. With traditional box braids, the braider would secure the braiding hair tightly to the scalp, forming a knot.
