Livestock farming is a major occupation in India and a large number of farmers depend on it for their livelihood. Animals provide milk, meat, eggs, wool, fur, leather, etc. India has the largest dairy herd at over 304 million strong and is the biggest producer of milk in the world. Livestock farming plays an important role in generating income for landless laborers, farmers, rural sector, women, etc.

The mixed crop – livestock systems of India are underpinned by the crop residues which contribute on an average 40 – 60% of the total dry matter intake per livestock unit.

~~(PDF) Contribution of Animal Husbandry to Indian Economy ...~~

Globally, livestock contribute about 40% of agricultural GDP and provide livelihoods and incomes for at least 1.3 billion people worldwide. However, despite its economic importance, livestock receive just a small fraction of official development assistance to all of agriculture. With more investment, livestock production can be the economic driver for millions throughout the developing world.

~~Economic Opportunity – Why Livestock Matter~~

Many farmers in India depend on animal husbandry for their livelihood. In addition to supplying milk, meat, eggs, wool, their castings and hides, animals, mainly bullocks, are the major source of power for both farmers and drayers. Thus, animal husbandry plays an important role in the rural economy. The gross value of output from this sector was 358 billion in FY 1989, an amount that constituted about 25 percent of the total agricultural output of 1.4 trillion.
