Introducing: Machine
Learning in R Machine
learning is a branch in
computer science that

Online Library Machine

studies the design of R algorithms that can learn. Typical machine learning tasks are concept learning, function learning or [predictive modeling], clustering and finding predictive patterns.

that machine learning is basically working with a large amount of data and statistics as a part of data science the use of R language is always recommended.

Therefore the R language is mostly becoming handy for those working with machine learning making tasks easier, faster, and innovative.
