Electric current flows more
easily in some types of
atoms than in others. Atoms
that let current flow easily
are called conductors,

File Type PDF Made Easy Handbook For Electrical

whereas atoms that don't let current flow easily are called insulators. An electric circuit is a closed loop made of conductors and other electrical elements through which electric current can flow. For example, a very simple electrical circuit consists of three elements: a battery, a lamp, and an electrical wire that connects the two.
