In Making Things Move, you'll learn how to build moving mechanisms through non-technical explanations, examples, and do-it-yourself projects—from art installations to toys to labor-saving devices. The projects include a drawing machine, a mini wind turbine, a mousetrap powered car, and more, but the applications of the examples are limited only by your imagination.

Making Things Move: DIY Mechanisms for Inventors, Hobbyists...

I see that you are teaching XYZ this semester, and I'd like to suggest a book I wrote as a companion text: Making Things Move: DIY Mechanisms for Inventors, Hobbyists, and Artists. If you can send me your address I would be happy to have my publisher mail you an evaluation copy.

Making Things Move

In Making Things Move: DIY Mechanisms for Inventors, Hobbyists, and Artists, you'll learn how to successfully build moving mechanisms through non-technical explanations, examples, and do-it-yourself projects—from kinetic art installations to creative toys to energy-harvesting devices. Photographs, illustrations, screen shots, and images of 3D models are included for each project.

Making Things Move: DIY Mechanisms for Inventors, Hobbyists...
