Originating in a conference on 'Time in Space: Representing Time in Maps' held at Stanford University in November 2017, the starting-point of the collected essays is the phenomenon that maps, in this era of digital mapping, now represent not just space but time: as the Introduction puts it, 'Maps Tell Time.' GIS (Geographic Information ...

Review: Time in Maps - Geography Realm

Below are brief reviews of the two works.The magnum written opus Maps of Time: An Introduction to Big History is an interesting change of reference from a historical perspective combining the disciplines of physics, cosmology, astronomy, geology, chemistry, microbiology, evolutionary theory, archaeology, politics, religion, economics, sociology, and history into one big area of contiguous study based upon much larger timescales than those traditionally taken in the study of historical time ...

Maps of Time opens with the origins of the universe, the stars and the galaxies, the sun and the solar system, including the earth, and conducts readers through the evolution of the planet before human habitation. It surveys the development of human society from the Paleolithic era through the transition to agriculture, the emergence of cities and states, and the birth of the modern, industrial period right up to intimations of possible futures.

Maps of Time: An Introduction to Big History. With a New ...

Maps of Time is not really intended, in my view, for a cover-to-cover read that swallows all the material in a sudden gulp, but rather in slow, meaningful sips that will treat your intellect to some serious and repeated "treats" that you will marvel at even as you find your entire perspective towards history and the sciences irrevocably altered by this monumental work.

Amazon.com: Customer reviews: Maps of Time: An ...

Abstract. Maps of Time opens with the origins of the universe - of the stars and the galaxies, of the sun and the solar system, including Earth - and conducts readers through the evolution of the planet before human habitation. It surveys the development of human society from the Paleolithic through the transition to agriculture, the emergence of cities and states, and the birth of the modern industrial period and hints at possible futures.
