What is mastering? Mastering, a form of audio post production, is the process of fusing the collective sounds in your audio mix, maintaining balance across the entire recording, and preparing the finished music project for distribution. Get a custom quote So what is mastering an album and why do I need it?

What Is Mastering? | CD Mastering | Mastering Engineer ...

The transfer process, for mastering audio, has been greatly simplified over recent years as a majority of final mixes are presented as digital audio files on a hard drive. This has largely negated the need for analog to digital conversion. Since the 1980s the conversion from analog to digital was seen as the weakest link in the mastering process.
