magnitude of force and on

## Online Library Mastering Physics Solutions Torques

the distance from the axis of rotation at which it is applied. However, because the forces are the same, the torque depends on the axis of rotation. A small force can produce the same

# Online Library Mastering Physics Solutions Torques

## Mastering Physics Solutions Torques

A car pitches down in front when the brakes are applied sharply. Explain this observation in terms of torques. Solution: The torque is given by,  $t = rF$

## Online Library Mastering Physics Solutions Torques

Here,  $r$  is the distance of the axis of rotation to the force and  $F$  is the tangential force. When the brakes are applied, it causes the wheels to lock and then the friction plays the role to stop the car.
