Mathematical Physics is part of the Institute of Mathematics, Astrophysics and Particle Physics of Radboud University Nijmegen. Our aim is to cover mathematical physics from a broad point of view, including all of the four traditional disciplines of mathematics, viz. Analysis, Algebra, Geometry, and Stochastics.

Following mathematics: the theory of partial differential equation, variational calculus, Fourier analysis, potential theory, and vector analysis are perhaps most closely associated with mathematical physics. These were developed intensively from the second half of the 18th century (by, for example, D'Alembert, Euler, and Lagrange) until the 1930s.. Physical applications of these developments ...
