output y . $f(x): y=2+(3.x)$

Introductory Mathematics for Economics MScs

This book is a self-contained treatment of all the mathematics needed by undergraduate and masters-level students of economics. Building up gently from a very low level, the authors provide a clear, systematic coverage of calculus and matrix algebra. The second half of the book gives a thorough account of probability, optimisation and dynamics. The emphasis throughout is on intuitive argument and problem-solving.

Manchester University Press - Mathematics for economists

This is a textbook for an undergraduate course in economics. It could be used in graduate courses for review purposes. The book incorporates input and output from the Maxima, an open-source...
