I'm having series issues with our Yasnac MX1 Matsuura Controllers and establishing a RS-232 connection. I've read every manual and still cannot figure out to change PARAMETER SETTINGS in the controller. I need to change Parameter #6003 D1 to 0 and D0 to 1. Well, when I am in that area, it won't let me change anything. What the heck. IS this

If uncertainties be encountered for particular maintenance opera-tion, refer to following YASNAC i80 documents for additional the ...

YASNAC i80—Yaskawa

Got this machine in here 500v model, with yasnac mx1 controller. Just been slow going learning how this machine wants to talk to me. Bit different goods, and navigating to the offset tables, entry etc: has been slow. So what Im wondering is if someone familiar with these machines wants to give a bit of a crash course in entry of info into the controller.
