~~Mazda 6 problems |
Ask Honest John |
Honest John~~

Can oil level rising
cause problems?

Yes, engine oil
diluted with diesel
is a poor lubricant,
premature engine
wear will occur and
engine life will be
reduced.

Furthermore, if the
oil level was to rise

Access Free Mazda 6 Diesel

too high oil seals can be damaged and in the worst case scenario oil could be drawn into the intake system which would lead to total engine loss if this wasn't caught early.
