Interesting that a C27 would be released at the same time as a C32, since it seems to be released out of sequence. What I have gathered so far is the C27 is a new technology product for McIntosh at that time and had the "new" controls which would become standard from that point on.

This page contains scans of McIntosh service data. Most of this data was in three loose-leaf binders donated by an anonymous benefactor. Data is listed by model number in alphabetical order, with miscellaneous documentation at the end of the list. "Schematic" is a schematic with little or no other info. Some have voltage data on them.
