1990. Trim unit has less than one year's use.

Storm cause trim switch in binnacle control to engage until battery drained (days maybe?)

Motor would not tilt down, towed boat to ramp (boat is wet slipped), trailered to house (less than 1/4 mile drive), unit started functioning .

The 1150 control valve mounts to the bottom of the PTT pump, with an input and output port.

The control valve doubles the ports and also has valves and springs to hold the motor in any trim or tilt angle. The Mercruiser PTT pump has a single input and output port and hooks to a fitting on the sterndrive casting,

Download File PDF Mercury

which doubles the ports.
I am not sure what else
is in that fitting. It may
be the equivalent to the
1150 control valve or
not.
