~~Mirrors And Lenses Study Guide Answers~~

For a mirror, it is positive if the image appears in front of the mirror. It is negative if the image appears behind. For a lens, it is positive if the image appears on the opposite side of the lens as the light source. It is negative if the image appears on the same side of the lens as the light source. is the distance from the object to the mirror or the lens (always positive). The only case, when it is negative, is the case, when you don't have a real object, but you do have an imaginary ...
