Le Persuasion Design Changing Behaviour By Combining ...

The BJ Fogg Behavior Model is a very useful model that derives from human psychology and is very recommendable to use for everyone who is involved in human-centred design or persuasive design. If you want to change behaviour three elements have to happen at the same time: motivation, ability, prompt. Also known as B=MAP. Advice is to start at ability.

Le Persuasion Design Changing Behaviour By Combining ...

What Causes Behavior Change The Fogg Behavior Model shows that three elements must converge at the same moment for a behavior to occur: Motivation, Ability, and a Prompt. When a behavior does not occur, at least one of those three elements is missing. The Fogg Behavior Model (FBM) makes it easier to understand behavior in general.

Behavior Model

According to Fogg, persuasive technology uses seven strategies to influence behavior: reduction, tunneling, tailoring, suggestion, self monitoring, surveillance, and conditioning. Reduction – simplifies a task that the user is trying to do. Tunneling – guides the user through a sequence of activities, step by step.

Le Persuasion Design Changing Behaviour By ...

Such union of media informatics and psychology is denoted as persuasive design and refers to all technological intervention components, which help people to take, regularly use and re-take (after relapses into unwanted behavior) interventions. Along this trend, the present chapter introduces (1) theories of health behavior change and summarizes (2) present persuasive design approaches, thereby ending with (3) future directions in the field.

Persuasive E-Health Design for Behavior Change | SpringerLink

To address the problem that most existing PTs employ the one-size-fits-all design approach, I developed the Model-driven Persuasive Technology (MPT) design approach for tailoring PTs to various user types. The MPT is based on studying and modelling user's behaviour with respect to their motivations.
