Modeling the Dynamics of Life: Calculus and Probability ...

An agent-based approach is proposed to computationally model the dynamics of online review evolution. We draw insights from social science theories (e.g., social exchange, motivation, social self-efficacy, and social bonds theories) and empirical data from pconline.com.cn, a famous online IT community in China. The agent-based model allows a comprehensive and in-depth understanding of the complex operational processes of ORSs.
