Welcome to the Companion Website for Modern Control Systems, 10th Edition. This Companion Website (CW) has been created to supplement study and teaching from the classic, best-selling textbook Modern Control Systems, 10/e by Richard C. Dorf and Robert H. Bishop. The CW contains resources for both students and instructors. These resources include:

Modern Control Systems, 10th Edition

It also covers modern control methods based on state variable models including pole placement design techniques with full-state feedback controllers and full-state observers. Many examples throughout give students ample opportunity to apply the theory to the design and analysis of control systems.
