Inflammation, neuronal degeneration, and lesion formation are likely among the causes of cognitive impairment in people with

Access Free Multiple Sclerosis Rehabilitation

MS. From Gray matter (neuron) loss in the brain, specifically in the cerebral cortex (the thin layer of cells that makes up the outer layer of the brain) and the thalamus (the relay station between the brain

Access Free Multiple Sclerosis Rehabilitation

and the spinal cord, through which nearly all motor and sensory information travels), correlates with cognitive impairment. 14 However, some patients with extensive ...
