GNU Bayonne can work with a lot of external servers such as web servers, databases and TTS. From versions 1.2.x Bayonne scripts can have sql queries and connect directly to databases. In this document we will show how to install and

# Read Online Mysql How To Gnu

configure Bayonne to connect to MySQL database and how to use sql queries inside Bayonne scripts.

## MySql How-To - GNU

To do this, we will use the `mysql_secure_installation` script, where we can not only define the password of the

# Read Online Mysql How To Gnu

root user, but we can also add other configurations. So, in Ubuntu, run the following command to use the mysql\_secure\_installation script. `$ sudo mysql_secure_installation`. On CentOS, the command is the same but run it as the root user.
