Estimate Sums Worksheet - Turtle Diary

For example, the standard practice for estimating sums and differences of fractions for grammar school students seems to be rounding to the closest $\frac{1}{2}$ by rounding to 0, $\frac{1}{2}$ or 1. This works well through a calculator such as if you are adding $\frac{3}{8} + \frac{11}{16}$. $\frac{3}{8}$ is closest to $\frac{1}{2}$ and $\frac{11}{16}$ is less than $\frac{3}{4}$ so it is also closest to $\frac{1}{2}$.
