But the vast influence of big data and the business opportunities it's unlocked for industry is quickly bleeding into the public's domain and demanding hard answers to questions about privacy and even free speech. Recent Congressional hearings confirm the urgency, even if they haven't quite landed on satisfying answers yet.

Big Data is so large, it's raising privacy & ethical ...

Privacy challenges in a big data world The privacy (and related security) discussion is not new – to consumers, citizens, companies or government agencies. What we're seeing, though, is that this discussion is shifting from IT, development and legal to the boardroom and our customers – not to mention our own dinner table.
