Last year at IBM Analytics University, one of IBM's leaders for the IIAS said the Puredata for Analytics factories had already been re-tooled. They wouldn't be making anymore. Netezza as we knew it, was dead. It's functionality would live on in the IIAS. As many who have acquired a new IIAS and migrated over, it's not straightforward.

The IBM® PureData® System for Analytics N3001 family is the latest generation of data warehouse appliances. Within each rack are numerous components that work together to provide the asymmetric massively parallel processing of the Netezza® architecture. The key hardware components include:

IBM PureData System for Analytics N3001 model summary

The Netezza appliance was the foundation of IBM DB2 Analytics Accelerator (IDAA). In 2012 the products were re-branded as IBM PureData for Analytics. In 2017, IBM replaced Netezza with the Integrated Analytics System using Power-8 processing frame and db2 as the database engine in an offering called db2 Warehouse. It featured both row-based and columnar storage plus high-speed flash drives.
