NPTEL :: Textile Engineering - Nonwoven Technology. Nonwovens are known as engineered fabrics. They are created with a view to targeted structure and properties by applying a set of scientific principles for a variety of applications. Nonwovens are manufactured by high-speed and low-cost processes. As compared to the traditional woven and knitting technology, a larger volume of materials can be produced at a lower cost by using nonwoven technology.

Course abstract The aim of this course is to provide a systematic treatment of symmetry in chemical systems within the mathematical framework known as group theory. Once we have classified the symmetry of a molecule, group theory provides a powerful set of tools that provide us with considerable insight into many of its chemical and physical properties.
