This study focus on a set of object oriented metrics that can be used to measure the quality of an object oriented design. The metrics for object oriented design focus on measurements that are applied to the class and design

~~An overview of Object Oriented Design Metrics~~

In 1994 Robert “Uncle Bob” Martin proposed a group of object-oriented metrics that are popular until now.

File Type PDF Object Oriented

Those metrics, unlike other object-oriented ones don't represent the full set of attributes to assess individual object-oriented design, they only focus on the relationship between packages in the project.
