observing projects using starry night answers

Observing projects using starry night answers

[Starry Night Pro 7](#) accurately simulates the trajectory of nine Apollo missions, including Apollo 11 landing on the moon, July 20th, 1969! The lunar trajectories of the nine Apollo missions, which flew to the Moon and back during the 1960's and 1970's, were calculated by analyzing official archived NASA data.

Starry Night Pro Version 7

This workbook offers exciting hands-on projects using the dynamic planetarium software, [Starry Night College™](#), which can be packaged with W. H. Freeman astronomy books upon request. These comprehensive projects work equally well as homework assignments or classroom activities, giving students additional opportunities to experience the phenomena of the cosmos.
