New in version 8.0: This page documents the New API added in Odoo 8.0 which should be the primary development API going forward. It also provides information about porting from or bridging with the “ old API ” of versions 7 and earlier, but does not explicitly document that API. See the old documentation for that.

Default value cannot depend on values of other fields of a record, i.e. you cannot read other fields via self in the function. Computed Fields ¶ There is no more direct creation of fields.function.

Fields — Odoo Development master documentation

Odoo has powerful grouping capacities, but they are kind-of strange in that they 're recursive, and level n+1 relies on data provided directly by the grouping at level n. As a result, while openerp.models.Model.read\_group() works it 's not a very intuitive API.

Javascript — odoo master documentation

Read the Docs is funded by the community. Read the Docs is a huge resource that millions of developers rely on for software documentation. It would not be possible without the support of our sponsors, advertisers, and readers like you. Read the Docs is community supported. It depends on users like you to contribute to development, support, and operations.
