We know that the Moon has almost no atmosphere and only about one-sixth of Earth ' s gravity. We even know that there is quite a bit of frozen water tucked away in craters near the Moon's poles. There is no wind or air on the Moon to help “ erase ” craters, so the surface is covered with the remains of old and new impacts.

NASA names 18 astronauts to train for Artemis moon ...

There's a lot we know about the Moon: it's roughly one-sixth the size of the Earth, is about 4.6 billion years old, is approximately 238,000 miles distant from the Earth, has no atmosphere, and is covered with a fine gray powder. We've walked on the Moon during six Apollo missions, and we've sent many more probes there to map it and study it.

On the Moon

The New Moon Phase occurs when the Moon is completely dark with zero-percent luminosity, while the Full Moon Phase is completely bright with 100-percent luminosity. The First and Last Quarter phases happen when the Moon is exactly half illuminated, with 50-percent luminosity.

Moon Phases Calendar for the month of December 2020

Being that it takes the weight of an object on earth and converts it to lunar weight, the formula is Weight on the Moon = (Weight on Earth / 9.81m/s²) * 1.622m/s². To find the weight on the moon, we divide the weight on earth by the earth's force of gravity, which is 9.81m/s². This calculates the mass of the object.

Weight On the Moon Calculator - Learning about Electronics

The Moon (or Luna) is the Earth ' s only natural satellite and was formed 4.6 billion years ago around some 30 – 50 million years after the formation of the solar system. The Moon is in synchronous rotation with Earth meaning the same side is always facing the Earth.

Man on the Moon - Wikipedia

The gravity on the moon is one-sixth of the Earth's gravity. It means that something will be one-sixth as heavy on the Moon than on Earth. The Moon is a rocky and dusty place. The Moon moves slowly away from the earth at a rate of 3.8 cm per year, due to the effect of tidal dissipation.

Moon - Simple English Wikipedia, the free encyclopedia

NASA has selected 18 astronauts from its corps to form the Artemis Team and help pave the way for the next astronaut missions on and around the Moon as part of the Artemis program.

NASA Names Artemis Team of Astronauts Eligible for Early ...

During a new moon, the Moon lies between Earth and the Sun. So, the side we normally see from here on Earth that's normally lit by the Sun is in its shadow. Only when the Moon is opposite from the Sun do we see that part of the surface lit up. At that point, the far side is shadowed and is truly dark.
