The magic constant = n [(n²+1)/2]. So, in the example of the 3x3 square: sum = 3 * [(9 + 1) / 2] sum = 3 * (10 / 2) sum = 3 * (5) sum = 15. The magic constant for a 3x3 square is 15. All rows, columns, and diagonals must add up to this number. Magic squares are square grids, in this instance with a 3x3 pattern that are filled with numbers, in such a way that each row, each column, and the two diagonals add up to the same number.By giving some of the numbers in the square, usually, including one complete row, children should be able to work out the missing numbers.Magic squares are somewhat similar to Sudoku in that they revolve around numbers in a square grid however Sudoku is normally on a 9x9 grid and formed around working out ...

KS2 Magic Squares Worksheet (teacher-made)

A magic square is a square array of numbers with the property that the sum of the numbers in each row, column and diagonal is the same, known as the "magic sum". The 'order' is the number of rows and columns, so a magic square of order 4 means it has 4 rows and 4 columns. If N is the order, then N x N different numbers are used to complete the magic square.

How to create magic squares—Owlkation—Education

Magic Square Puzzles Magic squares are one of the simplest forms of logic puzzles, and a great introduction to problem solving techniques beyond traditional arithmetic algorithms. Each square is divided into cells, and the rules require that the sum of any row, column or diagonal in the square be the same.

One Magic Square-Vegetable Gardening-The Easy, Organic ...

One Magic Square is well written, to the point, and very practical. The lists of common vegetables are all accessible to the curious home gardener, and the simple suggestions for use are inspiring. Lolo puts in just enough information on the importance of growing your own open pollinated seeds to encourage even the most reluctant, without sounding preachy.

The sum is referred to as the magic constant. For a 3x3 magic square, there is actually only one normal solution and all of the puzzles are derived from rotations or reflections of that puzzle. The normal variations of these puzzles (the 3x3 puzzles that contain only 1-9) will have a magic constant of 15. This should make solving the early puzzle worksheets pretty easy.
