The LNL-500 Intelligent System Controller (ISC) by Lenel serves as the access control engine for an OnGuard system. The ISC provides power, performance, and flexibility for the most demanding applications. Multiple combinations of Input Control Modules, Output Control Modules, and Card Reader Interface Modules can be connected. The ISC can communicate upstream at 38.4 Kbps via RS-232/RS-485 multidropped configuration, modem dial-up communication, or Ethernet TCP/IP networks.

LNL-500B The Lenel Biometric Reader Interface Gateway (BRI) is an extremely versatile and vital link between the Lenel LNL-2000 or LNL-3300 Intelligent System Controllers (ISCs) and biometric readers from multiple manufacturers.

Biometric Reader Interface Gateway - Lenel

through one of two reader interface modules. The single (LNL-1300) or dual (LNL-1320) reader interface module interprets the Wiegand communication (Data 1/Data 0 or Clock and Data) from the reader and sends the signal back to the ISC via RS-485 communication. The reader can be located up to 500 feet (152 m) away from the reader interface module.
