What is the difference
between MPS and
MRP?

As Ptak noted, MRP and
production planning and
scheduling software

operate in synergy – with the distinction that production planning is more concerned with operations, rather than materials. Production planning and scheduling software is designed to extend (not substitute) the functionality of MRP in four primary ways.

Oracle Master Scheduling/MRP and Supply Chain Planning also plans any MRP planned items that have an MPS planned component. This ensures that all derived demand is correctly passed down. Once you have generated an MPS plan, you can make a copy of the plan that is identical to the original.

discrete job for 60,
assume you lose 20% of
that discrete job, or 60
times 20%, or 12 units.
The net supply from the

Overview of Plan Control | OracleUG

In short, an MRP, or Materials Requirements Planning, is used to determine how many materials to order for a particular item, while an MPS, or Master

Production Schedule, is used to determine when the materials will be used to produce an item.

The calculations are exactly the same for each—with one distinction:
