Oracle Order Management R12

Technical Reference

Technical references are intended for system integrators and implementers. For the main documentation, see book Oracle SCM Cloud, Implementing Order Management. Oracle periodically moves content from Technical References for Order Management Cloud to this book. For details about content that Oracle moved, see topic What's New in Implementing Order Management at the beginning of the book.

provides seeded workflow process definitions for both orders and lines and enables you to define both order header and order line transaction types. The new Order Line differs functionally and technically from its R11 Order Entry counterpart. It contains attributes from old SO_HEADERS, SO_ORDER_LINES, and SO_LINE_DETAILS tables, in addition to some new attributes. Order Management offers Line level independence; each line has its own flow.
