While inorganic chemistry includes all elements, organic chemistry studies compounds of Carbon.

Why is carbon so important that it is studied under a different branch?

of Organic Chemistry.

This is the beginning of organic chemistry. In

this chapter, you study the basic concepts like

IUPAC nomenclature,

isomerism, inductive effect, resonance effect.

There are some reagents

as well like nucleophile

and electrophile that

comes into picture only

during the time of

organic reactions.
