

Package Kmlshape R

Thank you entirely much for downloading **package kmlshape r**. Maybe you have knowledge that, people have seen numerous times for their favorite books taking into account this package kmlshape r, but end up in harmful downloads.

Rather than enjoying a fine book later than a cup of coffee in the afternoon, instead they juggled past some harmful virus inside their computer. **package kmlshape r** is manageable in our digital library an online access to it is set as public therefore you can download it instantly. Our digital library saves in combination countries, allowing you to get the most less latency epoch to download any of our books in the same way as this one. Merely said, the package kmlshape r is universally compatible once any devices to read.

Package 'plotKML' - cran.r-project.org

The purpose of the algorithm is, given a curve (trajectory) composed of line segments, to find a similar curve with fewer points. The algorithm defines 'dissimilar' based on the maximum distance between the original curve and the simplified curve. The simplified trajectory consists of a subset of the points that defined the original trajectory.

This function is a C adaptation of the distFrechet code from kmlShape package for use with a matrix or a dataframe so that the user can compute pairwise distances between all trajectories. It is highly recommended to use this function over frechetDist because it is a lot faster. Value A dist class object of size NxN, where N is rows number in the input data Author(s) Fernando Pérez-Sanz ...
