Abstract: This paper presents an automatic people counting system based on face detection, where the number of people passing through a gate or door is counted by setting a video camera. The basic idea is to first use the frame difference to detect the rough edges of moving people and then use the chromatic feature to locate the people face.

Once all the fingers and toes have been used, the body seems finished as the basis of a counting system, but the Oksapmin people of Papua New Guinea have a base-27 body-derived system. The fingers are 1 through 5, and then counting goes up the arm, with the wrist 6, mid-forearm 7, up the arm to the neck at 11, an ear at 12, an eye at 13, the nose at 14, and back down the other side of the head ...

Traf-Sys Inc. offers a full range of people counter systems that help organizations collect foot traffic information. Our powerful sensors and people counting software give actionable information that increases efficiency and profitability. With Traf-Sys real-time traffic counters, you can gain vital insights on revenue, staffing and marketing.

*Accurate People Counting Sensors & Software | Traf-Sys*

Retail analytics and business intelligence with video people counting and tracking. Accurate footfall measurement utilising CCTV cameras. Integrate with POS data for sales conversion figures.

*Retail Intelligence from the Leaders in Video People Counting*

World's No.1 People Counting System FootfallCam 3D MAX is a UK-engineered people counter, designed to optimise business operations and efficiency. From retail chains to shopping malls, from airports to public venues, our people counter offers a comprehensive understanding of consumer activities, so you can drive your business' growth.

Abstract. We present in this paper a system for passengers counting in buses based on stereovision. The objective of this work is to provide a precise counting system well adapted to buses environment. The processing chain corresponding to this counting system involves several blocks dedicated to the detection, segmentation, tracking and counting. From original stereoscopic images, the system operates primarily on the information contained in disparity maps previously calculated with a novel ...

Video-based People Counting System Market - Introduction. Video-based people counting systems are majorly used for real-time people traffic measurement by using a combined system of software and hardware sensors. The real-time data about traffic helps in people management and provides security as per human traffic in specific areas and sections. Growing technological advancement in the retail sector drives the adoption of people counting systems to manage the customer flow and help ...

*Video-based People Counting System Market Insights by 2030*

Global Video-based People Counting System Market 2020 by Manufacturers, Type and Application, Forecast to 2025 is the latest report released by MarketsandResearch.biz that provides helpful insights into all the leading trends of the market. The report presents an in-depth analysis of the key prospects of growth, main growth avenues in the estimation year and existing growth dynamics over the assessment period from 2020 to 2025.

*Global Video-based People Counting System Market Analysis ...*

Thermal counters work by detecting people from their body heat profile. These devices are ideal for general people counting, tracking live occupancy , and a range of security applications. They are widely used to monitor footfall in the banking, retail , and security sectors – as well as tracking in passenger hubs and transport environments, and visitor attractions .
